

E24EZ

24VDC ROLLER ACCUMULATING CONVEYOR

Hytrol's E24EZ is a 24VDC powered roller conveyor designed to provide efficient zero-pressure accumulation for a wide range of products. Powered by Hytrol's EZLogic® Accumulation System, it helps maintain product separation while supporting smooth, controlled product flow. Its all-electric operation, quiet performance, and modular design make it ideal for distribution, fulfillment, packaging, and manufacturing applications..

PRODUCTS CONVEYED	APPLICATIONS
• Cartons • Boxes • Totes • Cases	• E-commerce fulfillment • Distribution Centers • Sortation feeding applications • Pick and pack operations
FEATURE	BENEFIT
EZLogic Accumulation System	Provides zero-pressure accumulation to help reduce product contact and damage.
All-Electric Operation	Elimates the need for pneumatic controls and reduces maintenance requirements.
Selectable Operating Modes	Supports multiple accumulation release strategies to fit operational needs.
Cascade Slug Release	Releases accumulated products in a controlled sequence to maintain product flow.
Modular Conveyor Design	Simplifies installation, expansion, and system modifications.

SPECIFICATIONS

E24EZ

MOTOR -----	24VDC
SPEED -----	25-125 FPM
CAPACITY -----	Up to 60lbs. per linear foot, 120lbs. per zone
WIDTHS -----	18", 24", 30", 36", 42"
LENGTHS -----	2' to 10' zone lengths available
